This issue's Feature Job is the Savannah State University – Science Technology and Marine Science Buildings in Savannah, Georgia. Charles Perry Partners, Inc. The Marine Science Building is an 18,834 square-foot facility mainly consisting of laboratories for biophysics, environmental toxicology, dolphin surveys and fish ecology and other marine-related studies. The property also has a new dock that stretches 1,000 feet into the marsh of the Georgia coast. The dock provides a natural setting that affords the students invaluable hands-on experiences with the marine life.

The two-story, 29,970 square feet, state-of-the-art College of Science & Technology Building is located a short distance away on the main campus and contains labs for civil engineering, digital systems and electronics.

Ace Electric, Inc. would like to thank Charles Perry Partners, Inc. for the opportunity to work on this project and we congratulate Savannah State University on their new facilities.
